

Omnipod® Insulin Management System Now Available for Use in Europe with Fiasp® Fast-Acting Insulin

October 2, 2018

Omnipod System to be Highlighted at the 54th Annual Meeting of the European Association for the Study of Diabetes in Berlin, Germany

LONDON--(BUSINESS WIRE)--Oct. 2, 2018-- Insulet Corporation (NASDAQ: PODO) (Insulet or the Company), the global leader in [tubeless insulin pump](#) technology with its Omnipod® Insulin Management System (Omnipod System), today announced that Novo Nordisk's Fiasp® (Fast-Acting Insulin Aspart) has been tested and found safe for use in Insulet's Omnipod System in Europe. Fiasp® is a new-generation, ultra fast-acting insulin developed by Novo Nordisk that enters the bloodstream two times faster, compared to NovoRapid®, so it more closely matches a healthy body's insulin response to a meal, thereby improving glycemic control. Insulet will showcase its Omnipod System during the European Association for the Study of Diabetes (EASD) annual meeting at the Messe Berlin Exhibition Halls in Berlin, Germany taking place 1st October to 5th October 2018.

This is the first European conference presence for Insulet since the Company assumed direct operations of its Omnipod System product line in Europe. At its booth (#3.P05), the Company will highlight the history of its innovation, from the current Omnipod System to its Omnipod Horizon™ Automated Glucose Control System currently in development. Insulet will also feature the Pod Challenge – an opportunity for attendees to wear a sample Pod to experience the freedom it allows patients.

"Our European team is thrilled for this opportunity to engage with leading regional healthcare practitioners and advocacy groups to showcase the unique benefits of our Omnipod System," said DJ Cass, General Manager, Insulet Europe. "The addition of Fiasp for use with the Omnipod System provides another option for both patients and prescribers to support their diabetes management needs. EASD is an important venue for direct contact with the diabetes community across Europe so they can see firsthand how our innovative product will help make diabetes a smaller part of their patients' lives."

"It is encouraging to see that Fiasp keeps expanding its reach, potentially benefiting more people in need of it via the Insulet Omnipod System," said Stephen Gough, Global Chief Medical Officer of Novo Nordisk. "With its ultra-fast acting profile, Fiasp has brought a new option for adults living with diabetes who require insulin to manage their post-meal spikes, and I am confident that they will find in Fiasp and the Omnipod System good allies to best manage their diabetes."

Prescribing information for Fiasp® can be found here: <https://www.novo-pi.com/fiasp.pdf>.

About Insulet Corporation:

Insulet Corporation (NASDAQ: PODO), headquartered in Massachusetts, is an innovative medical device company dedicated to making the lives of people with diabetes and other conditions easier through the use of its Omnipod product platform. The Omnipod Insulin Management System provides a unique alternative to traditional insulin delivery methods. With its simple, wearable design, the disposable Pod provides up to three days of non-stop insulin delivery, without the need to see or handle a needle. Insulet also leverages the unique design of its Pod, by tailoring its Omnipod technology platform for the delivery of non-insulin subcutaneous drugs across multiple therapeutic areas. Founded in 2000, more than 140,000 users across the globe rely on Insulet's Omnipod Insulin Management System to bring simplicity and freedom to their lives.

On July 1, Insulet assumed direct operations of its Omnipod Insulin Management System product line in Europe, including sales, marketing, training and customer support activities. This allows Insulet to be closer to the diabetes community and identify opportunities to support European customer needs over the long-term, as Insulet does in the United States and Canada.

Forward-Looking Statement:

This press release may contain forward-looking statements concerning Insulet's expectations, anticipations, intentions, beliefs or strategies regarding the future. These forward-looking statements are based on its current expectations and beliefs concerning future developments and their potential effects on Insulet. There can be no assurance that future developments affecting Insulet will be those that it has anticipated. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond its control) or other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements, and other risks and uncertainties described in its Annual Report on Form 10-K, which was filed with the Securities and Exchange Commission on February 22, 2018 in the section entitled "Risk Factors," and in its other filings from time to time with the Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should any of its assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements. Insulet undertakes no obligation to publicly update or revise any forward-looking statements.
